

To: Our Most Valued Customers

August 28, 2007

From: Gretchen George President of Pet Rageous Designs Inc.

We want to express a special thank you for helping us to continue to grow our business at **Pet Rageous Designs**. We are continuing to design new and innovative products to grow your retail sales, please the consumer and, of course, to continue to make the most treasured pet in everyone's home as happy as can be!!

Our #1 mission and priority is to always make sure ALL of our products are PET SAFE! We demand and receive, from our factories, stringent quality control standards to ensure that our goods meet our, and your, quality expectations and fully comply with the USA FDA standards. Furthermore, we only produce our pet bowls out of high fired stoneware.....which makes it extremely durable, dishwasher and microwave oven safe! To ensure that our ceramic products are safe for you and your pet, we require that our factories be certified by the China National Certification and Accreditation Agency which in cooperation with USA FDA monitors and certifies factories.

The FDA issued this statement concerning the CNCA-Certified Ceramic Tableware Factories initiative, [Public Release List No. 29, May 2007](#).

"On January 6, 2006, the Food and Drug Administration (FDA) of the United States and the China National Certification and Accreditation (CNCA) signed a Memorandum of Understanding (MOU) pertaining to the safety of ceramic tableware produced in China and exported to the United States "The MOU specifies, among other provisions, that CNCA, through its network of provincial, municipal, and local inspection offices [currently called China Commodity Inspection Bureaus (CCIBs or CIQs)], institute a certification system for ceramic tableware production facilities in China to provide FDA with reasonable assurance that ceramic ware produced in these facilities and exported to the United States will satisfy FDA action levels for leachable lead and cadmium." For the complete article see the following link <http://www.cfsan.fda.gov/~comm/ceramic.html>

Again, we want to say thank you for your support and we look forward to being able to continue to meet the demands of making sure all of our pet products are safe, innovative and decorative for your customer's home and pet.

Gretchen George
